

# WareHousePro

(Release v 3.1.x)

## Features and Highlights

## Warehouse Pro

(release 3.1.x)

Warehouse pro is an intelligently designed and feature rich '*out of box solution*' for your warehouse management needs.

Unlike lots of competitions, Warehouse Pro focuses on providing solutions for the core issues towards effective warehouse management. Along with a powerful inventory control system, it provides tools to manage warehouse storage and several housekeeping processes.

An integrated housekeeping module offers smart tools to ease and plan your space utilization to the optimum and carryout routine house-keeping jobs such as: packing, palleting, Bin reservation, space allocation, space optimization, zoning, goods tracking, shipping and arrival schedules etc more effectively and efficiently.

Be it a small private warehouse or a large multi location public warehouse, Warehouse Pro offers you a total control on your warehousing activities by providing important information about the core issues to enable you to make correct business decisions.
